Portfolio & open-source work at adrianborges.ca

About

Frontend engineer with 4+ years leading and delivering production-grade platforms for enterprise clients including RBC, the Canadian Olympic Committee, and StackAdapt. Specialized in React, Next.js, TypeScript, and custom Gutenberg block development. Actively expanding into AI integration and cloud architecture (AWS, Google Cloud).

Professional Experience

Frontend-Focused Full-Stack Engineer — Trew Knowledge · 2022 – Present

Clients: RBC, Maple Leaf Foods, Canadian Olympic Committee, StackAdapt, XTalks, HousingWire, Sonova, Dentistry for Children, Signal49, Friends Publishing, and others.

- **Led enterprise frontend delivery:** Owned end-to-end frontend architecture for RBC, StackAdapt, and the Canadian Olympic Committee defining component systems, coding standards, and performance benchmarks adopted across teams.
- **Cut page load times by up to 40% for a national food manufacturer:** Resolved critical frontend bottlenecks for Maple Leaf Foods through code splitting, lazy loading, and modern rendering patterns — directly improving Core Web Vitals scores.
- **Built and extended 100+ custom Gutenberg blocks in React/TypeScript:** Developed blocks from scratch and extended existing ones with new capabilities, establishing updated coding standards adopted across client projects, and owned parent/child theme architecture from the ground up.
- **Owned full-stack integration work:** Built and maintained backend services and REST/GraphQL API integrations using PHP and Node.js across diverse client environments.
- **Served as the primary technical escalation point for production incidents:** Primary point of contact for critical incidents, diagnosing, and resolving production failures under tight timelines.
- **Built internal automation tooling:** Designed and maintained custom WP-CLI tools to automate largescale content updates, configuration migrations, and operational workflows. Reducing manual overhead and minimizing risk during high-stakes platform changes.
- **Collaborated cross-functionally at a senior level:** Partnered directly with product, design, and engineering stakeholders to translate business requirements into scalable, user-focused technical solutions under real production constraints

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Vue, HTML5, CSS3, SCSS, Tailwind

Stacks: MERN, T3 (Next.js + TypeScript + Tailwind), Headless WordPress (WPGraphQL + React/Next.js), MEVN (Vue)

Backend & APIs: PHP, Node.js, REST, GraphQL, MySQL, MongoDB

Platforms: WordPress (multisite, super-admin, Gutenberg), WPVIP, WP Engine, Vercel

CI/CD & Tooling: Git, GitHub, CircleCI, GitHub Actions, WP-CLI, Docker, Postman, Bruno

Cloud & AI: AWS (in progress), Google Cloud (in progress), Anthropic API completed Claude developer courses

Additional: Performance optimization, accessibility, responsive design, Agile workflows

Education

Full-Stack Web Development Certificate · Concordia University / DecodeMTL · 2022

Bachelor of Arts & Science – Philosophy · Concordia University

Languages

English & French (fluent) · **Italian & Spanish** (basic)

Interests

3D modeling and printing (Fusion 360, Cinema 4D) · Graphics and video editing (Photoshop, After Effects, DaVinci Resolve) · Hands-on crafting (leather and wood)
